SUMMARY

I've spent the last 2 years building web apps with the MERN stack — mostly React, Next.js, and Node.js. I care about making things fast and actually work well for users. I cut page load times by 20% on a recent project and set up Jest tests that caught bugs before the production — reduced issues by about 30%.

EXPERIENCE

Frontend Developer

Bidolab Tech Pvt. Ltd

07/2025 - Present Mumbai

A web development company providing full-stack applications.

- Implemented unit and integration tests using Jest, reducing production bugs by 30%
- Mentored 2+ junior developers, improving code quality and reducing review cycles by 25%
- Optimized frontend performance, improving page load speed by 20%
- Promoted best practices in frontend development, enhancing maintainability and scalability

TRAINING / COURSES

MERN Stack Development Course

Heuristic Academy

STRENGTHS

Professional Strengths

I work well in teams, pick up new tech quickly, and I'm the person people ask when something breaks in production

KEY ACHIEVEMENTS

Revenue Growth Contribution and Team Performance

- Contributed to 7% revenue growth through MERN stack project development
- Recognized as Best Performer (2023–24) for technical contributions and team impact

SKILLS

Next.js	React.js	Express.js	Node
MongoDB	API	Redux toolkit	Python
Bootstrap	CSS	jQuery	WordPress
Debugging	Figma	Front-end	Git
GitHub	JavaScript	JSON	AWS
Material UI	PHP	Redux	TypeScript
Tailwind CSS			

PROJECTS

MeraEv

12/2025 - 5/2026

India's only EV-first vehicle discovery and ecosystem platform. We're with you every green mile.

- Developing EV-focused platform with EMI calculators, subsidy tools, and charging station locators
- Integrated APIs for real-time vehicle data, pricing, and city-wise insights
- Improved user engagement through interactive tools and optimized UI

NestPDF

07/2025 - 11/2025

A comprehensive PDF management platform featuring tools for conversion, e-signatures, and workflow automation.

- Built a full-featured PDF platform enabling conversion, compression, editing, and e-signature
- Improved document processing efficiency by 40%
- Designed scalable backend APIs for handling multiple file operations efficiently
